Comments from Pupils

"I think it is a good idea because people are addicted to it and people don't come to school tired and some people get angry after coming off it. I don't have any problem with it."

"I think it's very good because now I spend more time with my friends and instead of thinking in school 'I need to get home and play my game', you think about taking your books home. And it is hard because it was very addictive and it's ok. I'm trying my best".

"I think it is a good idea because you will do your homework better".

"I think it is a very good idea because you can concentrate better and you're not as tired in the morning".

"I think it's a great idea because children get more time learning instead of playing video games all the time".

"I think it is a very good idea and will help people have better scores, sleeping and more important, interacting".

"I like the idea but it is really hard. My little sister is doing it aswell. (Child's sister) likes doing it and to be honest she is doing a bit better than me but just a bit not a lot. Mom and Dad think it's a great idea just like me".

 "I think it's a great idea because people get to pay more attention in class and now everyone is at the same level. Also, people can interact more with your family, your friends more and when you got to your friend's house, you can do other things than play on a device".

"All in all I think it is good because you are happier and you also concentrate a lot more and even my Mom and Dad think that I'm a lot happier and that I talk a lot more and I don't really mind".

"I think it is a good thing to do".

"Hard at the start, easy at the end".

"I think it lets children see what's going on in the world and be more active".

"I think that it is a bad and good idea. It is bad because it gives the child less fun and boardgames only make you bored (it's in the name!). But it's good because it gets you more concentrated on your work".

"It's fine. It's very easy. Not hard at all. It encourages us 4th Class to do stuff such as play board games, read books and more. I already had that rule in my house, so, as I said before, it's easy. I don't mind at all".

"I think it's a good idea because kids are more concentrated at work and its easy for some people because they have no electronics like me. I never had it and at my friend's house they have electronics so I can go to their house".

"I think it is good because it makes us play outside and read more".

"I think it is a great idea because: not many schools do it and people might not be as: like bossy, mean, unkind and if someone was not on the internet, they would not be sad then. Keep on doing it!"

"I think that it is a good idea, because some people can't concentrate well at school. I find it very easy because I don't usually use technology that often. It is a very good idea!".

"Well I like the idea because some other people heard about this technology idea and they are trying to do the same. Well… I like the idea".

"I think it is a good and bad thing because yesterday I played a tiny bit and now I really want to play so it should be Friday, Saturday only. The good thing is my sister played with me in her spare time. Usually she plays Minecraft. She is doing the project too".

"I find the project quite hard when I see my brother playing. I do find it important because I get better sleep which is important and I look forward to the weekend to play with it but I try to limit my time which is hard".

"I think it is a good idea because kids get more sleep and can concentrate in class. I feel I am concentrating more".

"I think it's quite hard because my sisters are always on theirs".

"I think it is a good idea because it encourages kids to do more things off screen".

"I think that this project is a good idea for some people but bad for people like me because I have restricted time so I am still able to use electronics but not for too long".

"I think that it is good because now you can concentrate on your work in school and play games at home. I think it is easy because I am used to it".

"I think it is a good idea but it is hard because I'm not used to it".

"I think it's a good idea because it stops people from causing violence and that you get to play outside with your brother and sister".

"Hi, I think that it is a smart idea. Kids come to school more alert and energized. Though it is taking the child's company away. Sometimes children will cry when they don't have a device but it is a good idea".

"I think it is a good idea because it encourages children to socialise with family and friends".

"I think it is a good idea because less screen time means more sleep and more concentrated on homework. Besides, we have books which I read and outside which I do too and play with friends and I usually go to my friend's house and stay for a long time so we play all day and go to our other friend's house but we watch movies on the telly".
